

# Frequently Asked Questions

## What It Is:

Slush Puppie concentrate is in liquid form and has a 5:1 mix ratio  
(5 parts water to 1 part concentrate)

## How It Works:

- 1 gallon of Slush Puppie concentrate makes 6 gallons of mixed product
- 1 case = 4/1 gallons of concentrate = 24 gallons of mixed product
- 1 case = 3379 oz. or:

844/ 4 oz. servings

422/ 8 oz. servings

675/ 5 oz. servings

375/ 9 oz. servings

563/ 6 oz. servings

337/ 10 oz. servings

482/ 7 oz. servings

281/ 12 oz. servings

- 1 Bag in a Box (BIB) = 5 gallons of concentrate = 30 gallons of mixed product
- 1 BIB = 4224 oz. or:

1056/ 4 oz. servings

528/ 8 oz. servings

844/ 5 oz. servings

469/ 9 oz. servings

704/ 6 oz. servings

422/ 10 oz. servings

603/ 7 oz. servings

352/ 12 oz. servings

## Handling:

- After concentrate is mixed with water it must be stored in a cooler  
(mixed product is good for up to 30 days before being added to machine)
- Always remember to shake product thoroughly before pouring into machine
- Any refrigerated mixed product should be re-shaken before being added to machine
- When mixing ahead, keep in mind mixed product should be rotated
